

Kshaunish Harsha

Applied AI | Gen AI | AI Agents | LLMs | RAG | End to End AI Systems

Mumbai, India • kshaunish.harsha2005@gmail.com • +91 8291537636 • [LinkedIn](#) • [GitHub](#)

TECHNICAL SKILLS

- **Languages:** Python (Primary), Java, JavaScript, TypeScript, SQL
- **Applied AI & LLM Systems:** OpenAI Platform, Hugging Face, Genkit, Google ADK, Agentic systems design, Multi-agent systems, Agent orchestration, Tool calling, RAG (Retrieval-Augmented Generation), Hybrid search (vector + BM25 + metadata), LlamaIndex, LangGraph
- **ML & Data Analysis:** scikit-learn, NumPy, Pandas, Matplotlib, TensorFlow, OpenCV
- **Backend & Deployment:** FastAPI, Pydantic, Celery, Firebase, API-based inference, Railway, Supabase, Docker
- **Databases & Infra:** PostgreSQL, pgvector, Redis
- **Web & Dev Tools:** Next.js, React, Tailwind CSS, Node.js, Streamlit, Git
- **Monitoring & Observability:** Prometheus, Grafana

PROJECTS

COMPLIANCE INTELLIGENCE PLATFORM – INVESTIGATIVE RAG SYSTEM

OPEN PAWS – INDUCTION TASK

Next.js • FastAPI • pgvector • RAG • Hybrid Search • Supabase • GPT-4o

- Built a **hybrid retrieval RAG platform** searching **1,600+ regulatory documents** via combined vector, BM25, and metadata scoring.
- Implemented **grounded, citation-backed chat** with zero-unsupported-claims constraints enforced via post-hoc validation.
- Deployed full stack across **Railway, Supabase, and Vercel** with an OCR ingestion pipeline (PyMuPDF + Tesseract).

FEDERAL REGISTER SENTINEL – AUTOMATED REGULATORY INTELLIGENCE PIPELINE

OPEN PAWS – PRODUCTION

GPT-4o-mini • FastAPI • PostgreSQL • Agentic Pipelines • Structured Outputs • Railway

- **Automated daily pipeline** monitoring federal regulatory publications across **7 government agencies** for legal and policy teams.
- Designed a **4-layer keyword + AI filtering system** with agency-specific thresholds to maximize recall on relevant documents.
- Implemented **schema-validated LLM summarization** with a 2-tier self-correction loop and an **idempotent, crash-safe pipeline** architecture.

AEGIS – AUTONOMOUS AI VIDEO DETECTION & ATTRIBUTION

MUMBAIHACKS 2025 – FINAL ROUND

Gemini • Google ADK • Multi-Agent Systems • Agent Orchestration • OpenCV • FastAPI • Vertex AI • Next.js

- Built a **multi-agent AI system** for detecting **AI-generated and manipulated videos**.
- Combined **LLM-driven reasoning agents** with **classical ML and computer vision baselines**.
- Implemented **consensus-based agent orchestration** with **confidence scoring, failure handling, and explainable outputs**.

DOES THE SAFETY SCISSOR EXIST – AI SAFETY RESEARCH

GLOBAL SOUTH AI SAFETY HACKATHON

Python • OpenRouter • LLM Evaluation • Benchmarking Design • Pandas • Matplotlib

- Ran **225 evaluations** across a 70B → 8B model ladder to test whether capability and reliability degrade together under forced model downgrades.
- Designed a **mechanical + human-in-the-loop scoring pipeline** with pre-registered ground truth and inter-rater agreement checks.
- Found **sycophancy flip rates were scale-invariant (~40-43%)** across every model tier, a policy-relevant finding on model-downgrade risk.

EXPERIENCE & LEADERSHIP

OPEN PAWS

Bengaluru, India

Resident Developer (AI Engineering/Development Intern)

MAY 2026 – JUL 2026

- Built and shipped a **production regulatory intelligence pipeline** for a national animal law and policy advocacy organization, automating daily review of the U.S. Federal Register — which publishes **tens of thousands of documents and 60,000+ pages annually** — replacing what was previously manual attorney and policy-staff review.
- Designed a **4-layer filtering pipeline** (keyword scoring + AI verification) across **7 federal agencies**, with a **self-correcting LLM summarization system** producing plain-language, schema-validated digests for legal and advocacy teams.
- Built an **investigative RAG platform** enabling hybrid search (vector + BM25 + metadata) and grounded, citation-backed chat across a **1,600+ document compliance corpus**.
- Designed **idempotent, crash-safe pipeline architectures** across both systems, deployed on Railway and Supabase.

CODEBASE, MPSTME

Mumbai, India

Vice President, Technicals

JUL 2026 – PRESENT

- Leading the **Technicals department**, curating technical events and hackathon challenges while delegating and coordinating technical operations across the team.

INSTAGRAM INDEPENDENT

AI Content Creator – [@kshaun.py](#)

FEB 2026 – PRESENT

- Create and publish AI-focused content, growing to **~1.4K followers** and **3M+ views** across all content.

EDUCATION

NMIMS, MUKESH PATEL SCHOOL OF TECHNOLOGY MANAGEMENT AND ENGINEERING

Mumbai, India

MBA Tech (Computer Engineering) – CGPA 3.20/4 (As of Semester 6)

JUL 2023 – PRESENT

CERTIFICATIONS & SPECIALIZED TRAINING

Google & Kaggle AI Agents Course • Oracle Cloud Infrastructure 2025 AI Foundations Associate • Google Gen AI Academy 2.0

ACHIEVEMENTS

MumbaiHacks 2025 Finalist • HackXplore 2nd Runner Up • Hyphen Ideathon Runner Up • Resonate+ Blockchain Conference Winner • Kriti UI/UX Hackathon (NIT Patna) – 4th Place • 4x College Hackathon Finalist
